

REMARKS

The present application has been subjected to a restriction requirement. In particular, the Examiner alleges that the application contains two patentably distinct species, namely:

Species 1: represented by Figure 3; and

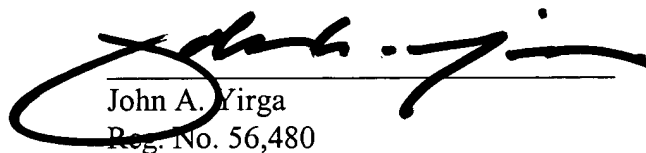

Species 2: represented by Figure 4.

The Office Action stated that the species are independent or distinct because figure 4, unlike Figure 3, shows an override switch third pole 102 is connected in parallel with the PTO switch second pole 80. Examiner further stated that at least claim 1 is generic.

Applicant provisionally elects without traverse for further prosecution all generic claims and claims associated with Species 1 represented by Figure 3, namely claims: 1 (held generic); 2-13 (claims 2-13 are either directly or indirectly dependent upon generic claim 1); 33-44; and 49-51. Applicant states that the above elected claims are readable on Figure 3.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies to charge payment or credit any overpayment to Deposit Account No. 23-0630 for additional fees required under 37 C.F.R. §§ 1.16, 1.17; particularly extension of time fees.

Respectfully submitted,

John A. Yirga
Reg. No. 56,480
